

# Guide to Curriki Grant Application

The application takes around **10 minutes**. You need to provide essential information, including your school name, address, and email. To make the process easier for you, we have provided answers to open-ended questions.

## Educational AI Software Tool Being Requested

You may apply for a grant for any K-12 Educational Tool that has a significant AI component and improves student learning or classroom instruction. If an Educational Software Tool has not been reviewed and approved by us, we will need to evaluate it prior to considering your grant. Attached quotes are required and can only be for a one school year term for a first use (not renewal) of software. Quote details must match the school applying for the grant.

### AI Software Tool Requested (Name and Description) \*

Levebee is an educational app designed by interventionists to help every child master math. Levebee's diagnostic assessment identifies the root causes of math struggles and guides targeted support. Over 1,000 AI-powered, evidence-based exercises adapt to each student, ensuring mastery before they move forward. Thanks to detailed reports, Levebee provides actionable insights accessible to any teacher.

### Vendor Name \*

Levebee, Inc.

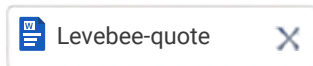

### Quote Amount \*

e.g. 9 990

**ⓘ Put down the amount from the official quote you will receive from us.**

### Attach Official Vendor Quote \*

Upload 1 supported file: PDF, document, or image. Max 100 MB.

**ⓘ [Request a quote from Levebee.](#)**

### Vendor Account Representative email address \*

support@levebee.com

## Implementation Information

Describe the scope of the tool use, how you plan to use it, and why you believe it will improve student learning and/or classroom instruction.

Grade levels where the tool will be used \*

e.g. K-3

**i Levebee fully covers grades K-3.**

Estimated number of students impacted \*

e.g. 270

Estimated number of teachers/staff impacted \*

e.g. 5

Briefly explain how this tool supports student learning and/or teacher effectiveness \*

Levebee supports student learning by identifying the root causes of math gaps and addressing them through targeted practice, adapted to their needs. Students build understanding before moving toward fluency and application. Levebee also supports teacher effectiveness by giving clear, actionable math insights into what each student understands and where they need additional support. The platform helps teachers plan targeted interventions, monitor progress, and use instructional time more effectively.
